TRADE CONE

Global Metal Trader

FY25-26

WELCOME TO OUR COMPANY

Trade Cone is a Global Scrap Metal Trading Company

Company Description

We source the scrap metals around the globe and purchase them with instant payments.

Based in Cardiff, United Kingdom and operating in more than six countries.

Purchase Items

Instant payment on site via bank transfer

1	Titanium Scraps	6	Platinum material
2	Nickel scraps	7	Palladium material
3	High temperature nickel alloy	8	Rhodium material
4	Gold material	9	Ruthenium material
5	Silver material	10	Iridium material

TITANIUM SCRAPS

Titanium Mesh

Source: PCB plant

Titanium Plates

Source: Electroplating plant

Titanium Grade 7&11

Source: Petrochemicals; Pharmaceutical Equipment; Heat exchanger

Enterprise Features

Source: Electroplating plant

TITANIUM SCRAPS

MMO Titanium Mesh Ribbon Anode

Source: Cathodic protection system

Titanium Plate for Electrowinning Non-Ferrous Metals

Source: Electrowinning plant

Titanium Plates for Seawater Desalination

Source: Seawater Desalination Plant

Titanium Mesh for PEM Electrolyzers

Source: Hydrogen production plant

TITANIUM SCRAPS

Titanium Mesh for Chlorate Production

Source: Chlor-alkali Industry

Titanium Plates for Etched Foil

Source: Chemical plant

Titanium Plate for Wastewater Treatment

Source: Wastewater treatment plant

Titanium Mesh for PEM Electrolyzers

Source: Hydrogen production plant

NICKEL SCRAPS

Nickel Mesh

Source: Electroplating plant

Electrolyzed Brine Nickel Cathode

Source: Waste water treatment plant

Nickel Ruthenium Mesh

Source: Chemical plant

Nickel Ruthenium Mesh for PEM Electrolyzers

Source: Chlor-alkali industry

HIGH TEMPERATURE NICKEL ALLOY SCRAPS

Turbine Blades

Turbine Blades

Turbine Blades

Turbine Blades

Source: Turbine blades widely used in aerospace, marine and industrial gas turbines

GOLD SCRAPS

Gold Plating Materials

Gold Plugs

Gold Wires

Gold Sponges

Source: Electronics, semiconductors, electroplating, jewelry processing, communications

SILVER SCRAPS

Silver Plating Materials

Silver Powder

Silver 925

Silver Paste

Source: Photovoltaics, medical imaging, electronics, photography, electrical appliances, laboratories

PCB / RAM / CPU SCRAPS

PCB Based Scraps

PCB Based Scraps

PCB Based Scraps

PCB Based Scraps

Source: Various types of discarded electronic products, as well as waste generated during the manufacturing process of electronic products.

PLATINUM SCRAPS

Pt Crucible

Pt Cutting Sheets

Pt Materials

Pt Catalyst

Source: Chemicals, glass, automobiles, laboratories

PALLADIUM SCRAPS

Palladium Sponges

Titanium-Palladium Grade 7/11

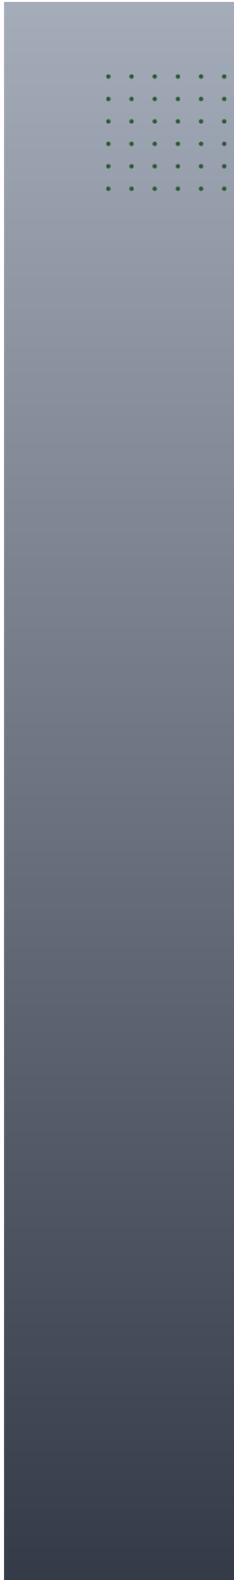

Palladium Plates

Palladium Catalyst

Source: Chemicals, glass, automobiles, laboratories

PALLADIUM SCRAPS

Palladium Catalyst

Palladium Oxide

Catalytic Converters

Palladium Powder

Source: Chemicals, glass, automobiles, laboratories

RHODIUM SCRAPS

Rh-Pt Wires

Catalytic Converters

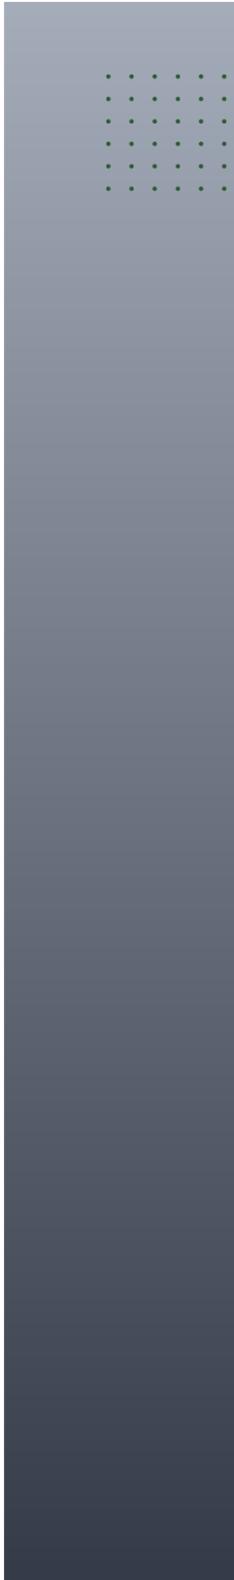

Rh Catalyst

Source: Chemicals, glass, automobiles, laboratories

Rh Ingot

RUTHENIUM SCRAPS

Ru Targets

Ru Catalyst

Ru Dioxide

**Nickel Mesh with
Ru Coating**

Source: Chemical industry, electrolysis, chlor-alkali, seawater desalination

IRIDIUM SCRAPS

Ir Catalyst

Ir Electrodes

Ir Crucible

Iridium Dioxide

Source: Chemical industry, electrolysis, chlor-alkali, seawater desalination

GLOBAL METAL SCRAPING BUSINESS

The Global Strategic Importance of Scrap Metal Recycling

The scrap recycling industry is a pillar of the circular economy, fueled by industrial demand for high-value materials managed by firms like **TradeCone**.

The sector focuses on reclaiming transition metals like titanium and nickel for aerospace and petrochemical use, alongside noble metals like gold and platinum for semiconductors.

By recovering complex components—such as turbine blades and iridium-coated anodes—from electronic and industrial waste, **TradeCone** reduces mining dependency and stabilizes the supply chain for global infrastructure.

Market Valuation and Green Tech Future

Worth hundreds of billions of dollars, the recycling market is expanding alongside the global transition to green energy.

Demand for palladium and rhodium catalysts remains a primary driver, while emerging sectors like hydrogen production and desalination create new lifecycles for titanium and ruthenium meshes.

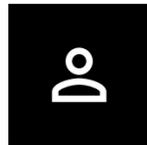

As electronic waste like CPUs and RAM continues to accumulate, TradeCone leads a future where recycled secondary materials are as essential as virgin ores for sustainable manufacturing.

OUR BUSINESS STRATEGY SIMPLIFIED

Our dedicated team will get in touch with you

Source and identify the scrap items

Scale and quality: Once the scrap items are sourced and identified and we will give you the best market prices immediately.

Site visit and inspection

No stones left unturned: We will arrange to visit your site immediately and inspect the items.

Arrange for collection

Collection and payment: We will arrange the collection and payment will be transferred before scraps leaves your site.

Continuous business forward

Pattern development: We look forward doing continuous for a long term basis and schedule a weekly or monthly pattern.
